Education

Bachelor of Technology -Computer Science and Engineering —

GL Bajaj Institute of Technology and Management, Greater Noida
2023 – 2027

CGPA: 8.6

Class XII — Delhi Public School, Bulandshahr (2023)

90.2%

Class X — Saint Momina School, Bulandshahr (2021)

91%

Experience

Hardware System Architecture & Communication Intern

2026

Landis+Gyr Limited

- Developing a **Python + PyQt automation framework** for hardware/RF validation using **CMW500, Saleae Logic Analyzer, DUTs & RF components**.
- Automated **end-to-end hardware test workflows across 5+ validation stages**.
- Building GUI-driven workflows and **serial/instrument communication modules** for repeatable hardware testing.

Virtual Internship Program – Cybersecurity

2025

Cisco Networking Academy & AICTE

- Completed hands-on training in cybersecurity fundamentals including network security, threat analysis, and secure computing practices.
- Gained practical exposure to security concepts, risk management, and industry best practices through project-based learning.

Projects

LifeLine (Telemedicine Application)

2025

React Native, Node.js, Express, SQLite, Gemini API

- Developed a **full-stack telemedicine platform** with **role-based authentication** for doctors and patients.
- Integrated an **AI-powered symptom checker** using **Google Gemini API** and implemented **digital health records with QR code generation**.
- Built secure **RESTful APIs** with **bcrypt authentication** and enabled **video consultations** through a scalable backend architecture.

Mini Public Key Infrastructure (Mini-PKI)

Nov 2025

Python, Flask, OpenSSL, RSA, X.509

- Built a **Flask-based PKI system** implementing end-to-end certificate lifecycle management.
- Generated **2048-bit RSA key pairs** and **X.509 certificates**, supporting certificate issuance, validation, and **CRL-based revocation**.
- Developed an **admin dashboard** and integrated an **AI-powered cybersecurity chatbot** for certificate-related assistance.

Deepfake Detection System

2025

Python, FastAPI, CNN, MTCNN, OpenCV

- Built an **AI-based deepfake detection system** using a **CNN + MTCNN pipeline**, achieving **90%+ accuracy**.
- Processed **100+ images** with **real-time prediction**, confidence scoring, and optimized face extraction for improved detection reliability.
- Developed a **FastAPI backend** for image upload, prediction, and automated report generation.

Technical Skills

Languages: Python, C, C++ , Java

AI: RAG ,LangChain ,Model FineTuning , MCP

Backend: FastAPI, Node.js (Basic)

Machine Learning: CNN, MTCNN, Computer Vision, Deep Learning

CS Fundamentals: Data Structures & Algorithms, OOP ,OS , DBMS

Security: PKI, RSA, X.509, SHA-256, Cybersecurity Fundamentals

Soft Skills

- **Problem-Solving and Adaptability**
- **Communication** and Collaboration Skills

Extracurricular Activities

- Member, **IEEE** (Institute of Electrical and Electronics Engineers)
- Member, **NSS** (National Service Scheme)

Certifications & Achievements

- Introduction to Cybersecurity — Cisco Networking Academy
- Cloud Security Fundamentals — Palo Alto Networks Cybersecurity Academy
- Agents and Workflows — OpenAI Academy
- Introduction to Agentic AI & LLM Architectures - SimpliLearn
- Winner — Tech Trivia 2025 (BIS Noida + GL Bajaj Institute)
